

# Midterm Practice

**Before we begin, tonight you will run the SPSS output on your own to study for midterm. Raise your hand if you need help.**

**This should take you no longer than 15 minutes.**

- 1. Download the 9\_30\_09 lab data from Elearning.**
- 2. Run the OMNIBUS F (ANOVA Table)--make sure you include the descriptive table and means plot under options.**
- 3. Run the planned contrast for  $H_0 = \mu_2 - \mu_3$ .**
- 4. After you are finished, paste the ANOVA and Contrast Results into EXCEL by selecting the SPSS table>right click>copy.**
- 5. Open Excel>select an Excel cell>right click>Paste**
